# Características | Characteristics

## Materia Prima | Raw material:

- Arcilla blanca con chamote
- El chamote es la arcilla horneada y molida (piedras) que le da textura y produce una apariencia rústica
- White clay with "chamote"
- Chamote is baked ground clay (stones) that gives texture and produces a rustic appearance

## Fabricación | Manufacturing process:

- Totalmente artesanal
- Producidas en tornos eléctricos por alfareros especializados
- Las bachas son piezas únicas
- Fabricadas en Argentina
- Handmade
- Produced by specialized potters with electric drills
- Each piece is unique
- Made in Argentina

## Decoración | Decoration:

- Interior: pigmentos cerámicos y esmalte transparente mate
- Exterior: pigmentos cerámicos dando apariencia símil piedra
- Interior: ceramic pigments and dull transparent enamel
- Exterior: ceramic pigments resembling stone

## Horneado | Baking:

- 1040<sup>o</sup> C en horno cerámico
- Dureza extrema
- La arcilla durante el horneado pierde una molécula de agua transformándose en cerámica
- 1904<sup>o</sup> F in ceramic oven
- Extremely hard
- Clay loses one molecule of water during baking process becoming ceramics

## Limpieza | Cleaning:

- Pueden utilizarse detergentes y limpiadores cremosos, ya que éstos no dañan el material ni alteran los colores
- Detergents and creamy products can be used since they don't harm the material or alter the colors

## Usos | Uses:

- Las bachas de apoyo pueden utilizarse sobre muchos materiales (madera, hierro, vidrio, mármol, cemento alisado)
- These sinks can be placed on different materials (wood, iron, glass, marble, flat cement)
